# About TAITRA

Founded in 1970 to help promote foreign trade, the Taiwan External Trade Development Council (TAITRA) is the foremost non-profit trade promotion organization in Taiwan. Jointly sponsored by the government, industry associations, and several commercial organizations, TAITRA assists Taiwan businesses and manufacturers with reinforcing their international competitiveness and in coping with the challenges they face in foreign markets.

Since its establishment, TAITRA has developed a well-coordinated trade promotion and information network composed of over 1,300 trained specialists stationed at its headquarters in Taipei, in five local branch offices in Taoyuan, Hsinchu, Taichung, Tainan, and Kaohsiung, as well as in over 60 representative offices around the world.

In association with its sister organizations, the Taiwan Trade Center, Inc. (TTC) and the Taipei World Trade Center (TWTC), TAITRA continues to do everything possible to adapt its trade promotion strategies to the changing international trends and conditions. TAITRA's major functions include Market Development, Strategic Marketing, Trade Information Services, Exhibitions, Convention Services, Trade Education, and TaiwanTrade (an e-Trading Hub service).

Tremendous business opportunities can be found in Taiwan's dynamic economy. Taiwan's strategic location, infrastructure and capital make the island an ideal springboard for business operations throughout Asia and the Pacific Rim. TAITRA, together with its experienced trade specialists, all stand ready to help you do business with Taiwan.

# Introduction to the Taiwan Information Security Industry

Taiwan, the information security industry advancement

Taiwan has been one of the hot spots for attacks by international hackers over the past three years. This is due to the convenient environment of increased information and network popularization in Taiwan. Therefore, the government and industries in Taiwan pay more attention to information security issues. As a result, the security industry in Taiwan has started to take off and develop rapidly. According to a survey conducted by ITRI IEK in 2017, the output value of the information security industry in Taiwan has reached 1.3 billion USD, and the annual growth rate has reached 10.3%. Moreover, vendors in the industry flourish in a diversified manner. With exception to "Mobile and IoT" and "Network Security," "Identity and Fraud Security," "Database and Data Protection," and "Mail Security and Social Engineering" have expanded in conjunction with the local increased information development in Taiwan and have abundant energy. Further, in response to global hacking attacks, "Threat Intelligence and Regulation Compliance," "AI Analytics, Intelligence and Response," and "Digital Forensics" have grown rapidly in recent years in Taiwan. Of course, under the active promotion of information security joint protection of the government, "Managed Security Service and SOAPA" has also become the focus for the development of the information security industry in Taiwan.

## There are four features in Taiwan information security industry

Rich ICT integration information security experience

There are excellent talents for information security and anti-hacking together with endless innovations and startup businesses in Taiwan

Information security, in other words, national security, is the key point of policy promotion in Taiwan, and managed security service and SOAPA has flourished

Leading positions for basic encryption and decryption technologies, data confidentiality, and database processing technologies

## Scope of Major Taiwan Owned Information Security Products

(Taiwan Cybersecurity Landscape)
